To know more about my all above listed Project Please Visit at our github profile

https://github.com/getsettalk

I have developed a web application using advanced technology, which stands as my best project to date. Through this project, I gained valuable experience and knowledge, paving the way for future projects to come.

Projects/App

Phone number lookup

This application is made with the help of expressjs, which is very easy to use. I have also used truecallerjs to make this web app, with help of which we can get the information of the user, it has some of the following features

- Responsive user interface
- used bootstrap for ui
- Validation
- dynamicly show data
- get data from Third party API

Pizza Ordring App

This web app is built with the help of nodejs, expressjs and mongodb which is in great demand in the market.I learned a lot after making this. Below are the many features of this application, You can find its source code on my GitHub account:

- fetch dynamicly Product from database
- Add to cart feature
- Sign in/up with JWT
- Order Pizza with Checkout
- Used MongoDB for Storing Data
- Responsive UI

Email Tracker

The purpose of making this application is that whatever email we send, that email has been read by him or not. This app is made with the help of php and mysql.

- Tracker user that email opened or Not
- get opening time
- send email with your gmail temp password
- used Cookies to make easy accessable

HERE IS MY RECENT DEVELOPED PROJECT:

Jeevan Darshan Foundation

This website belongs to my client, which is developed for their NGO, PHP is used in backend to build this website, and Bootstrap 5 is used to develop UI. this is live now.

- Easy And Responsive UI
- Form handling
- Form Validation
- Admin Authentication
- Admin Dashboard
- Big Text and image Data handling as dynamic
- Save Form data with Ajax
- Used Mysql Database to store data

View: https://jeevandarshanfoundation.com/

Security Guard Website (UI)

This project is a ui based static project, i have used sass to make it, as well as bootstrap 5.and also used animate.css with owl carousel for image slider

- Responsive For Small And Big Screen
- Easy and best UI
- Image Slider with animation
- Responsive Form UI
